OKEA ASA

Description

Text	Date updated
31/7-1 (Brasse) is a discovery in the northern North Sea, 13 kilometres south of the Brage field. The water depth is 120 metres. The discovery was proven in 2016 and delineated with four wells in the period from 2017 to 2019. The reservoir contains oil with a gas cap in the Upper Jurassic Sognefjord Formation. A development concept with subsea templates tied-back to Brage is being evaluated.	16.12.2023
