Equinor Energy AS

Description

Text	Date updated
30/2-5 S (Atlantis) is a discovery in the northern North Sea, 35 kilometres southeast of the Gullfaks field. The water depth is 140 metres. Atlantis was proven in 2020. The reservoirs contain gas and condensate in Middle Jurassic sandstone of the Brent Group. Various development solutions have been evaluated, and the likely solution is a tie-back to the Gullfaks C platform.	19.12.2023
